*Zayo is an international provider of dark fiber, lit and IP services, and carrier-neutral colocation and interconnection. Our network serves 271 markets in seven countries and 45 states, plus Washington D.C. Our 72,800 route miles of fiber includes metro footprints in Tier 1-5 cities, as well as many intercity routes.*

**Dark Fiber:** virtually unlimited bandwidth with a single pair of fibers on both existing Zayo fiber infrastructure and custom new construction

**Wavelength:** 2.5 Gbps, 10 Gbps, 40 Gbps or 100 Gbps in single or multiple waves on metro or longhaul routes, with low latency routes available

**SONET:** transport services ranging from DS3–OC192 in point-to-point, hub-and-spoke or dedicated ring

**Ethernet:** MEF-certified options for E-Line, E-LAN or Private Dedicated Network service, with speeds of 10 Mbps–10 Gbps, reserved bandwidth availability and multiple interface options

**IP Transit:** speeds ranging from 10 Mbps-10 Gbps on a Tier 1 network with settlement-free peering that serves seven countries and offers end-to-end service, minimizing hops

**Dedicated Internet Access:** end-to-end service over a deep metro footprint and a Tier 1 IP network with speeds from 10 Mbps-10 Gbps

**Virtual Private Network (VPN):** service delivered in two standard forms, IP-VPN and E-VPN, on Zayo’s global owned optical network, enabling end-to-end VPN service between multiple locations

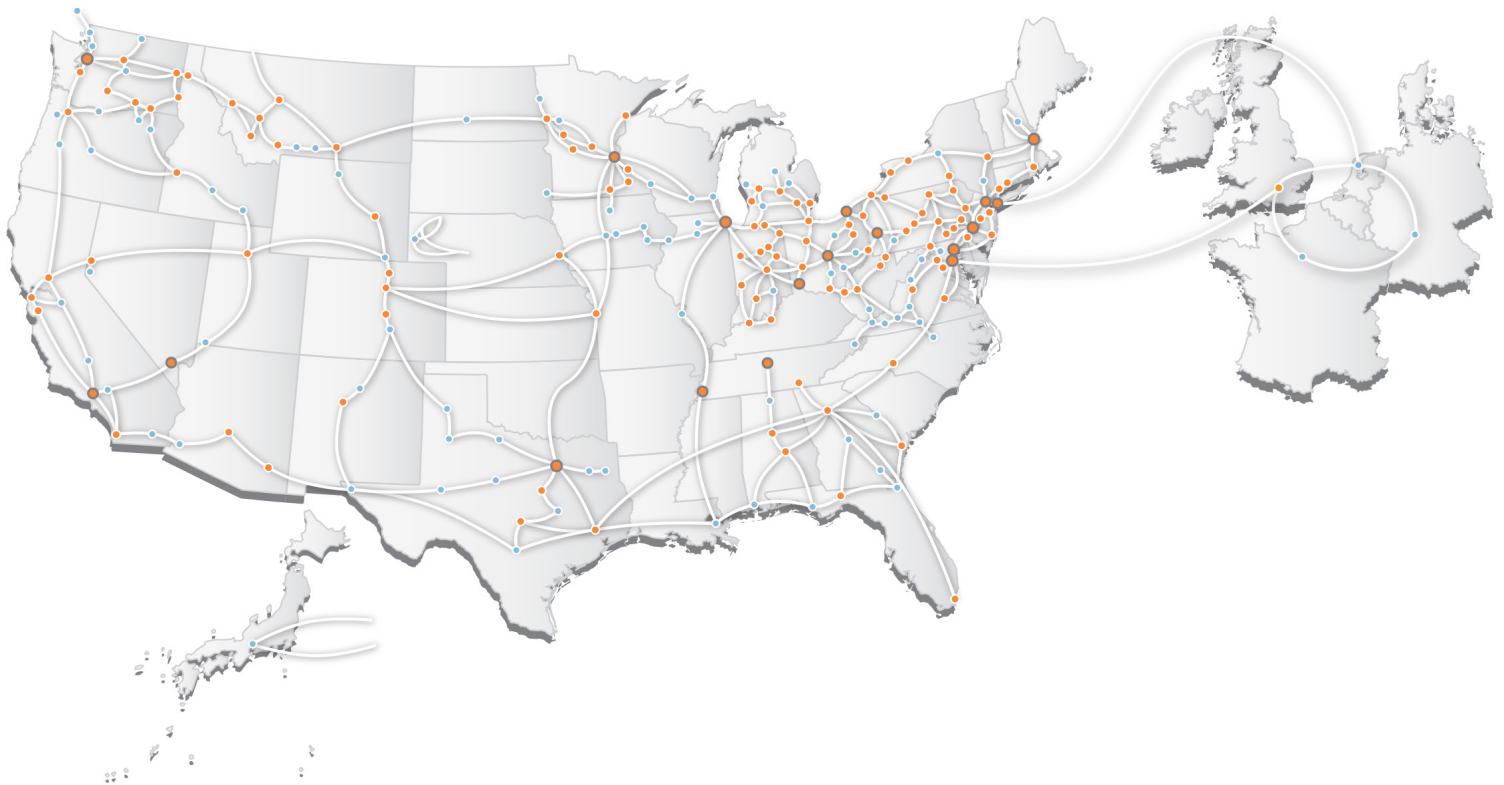

**Colocation & Interconnection:** presence in 20 carrier hotels in 18 major markets and carrier-neutral access to domestic and international networks, with redundant connections to all major markets via interconnections to in-suite, intra-building and metro locations

**Mobile Infrastructure:** solutions for FTT, Small Cells, and DAS

## Corporate Overview

Bandwidth Infrastructure for Growing Businesses

### Recent Acquisitions

- LiteCast — 2012
- First Telecom Services — 2012
- USCarrier — 2012
- FiberGate — 2012
- AboveNet — 2012
- Arialink— 2012
- MarquisNet — 2011
- 360networks — 2011

### Network

- Own and operate global metro and intercity fiber network
- Serve a unique combination of Tier 1-5 markets
- Focus exclusively on core fiber optic bandwidth infrastructure
- Offer dark fiber, lit fiber, IP services and carrier-neutral colocation

### Equity Investors

- Battery Ventures
