

# AirePBX™

CLOUD HOSTED IP PBX

**How many times have you upgraded your cell phone in the last 10 years? Isn't it time that you upgrade your office phone system to the next generation of IP based communications?**

Your office communications have just gotten easier, more flexible and much more fun! AireSpring's all new AirePBX™ puts a cutting edge telecommunications platform in your pocket, literally. You'll quickly be able to direct your calls to your desk, home, co-worker or even to your cell phone. All the features you could ever want for one easy low price. And since the service is hosted in the cloud, AireSpring does all the work for you, including installation and monitoring. . . it's like communication magic.

AirePBX is offered over AireSpring's nationwide voice optimized, fully managed next generation IP backbone. You can bring your own bandwidth or ensure voice quality by selecting our fully managed end to end network solution. So let's sum this up: Full featured, hosted in the cloud, fully managed by AireSpring, professional on-site installation and configuration, cutting edge features which will have you the envy of your peers, and the most competitive rates available.

## NEXT GENERATION FEATURES

AirePBX comes with all the features you'd expect with phone service, such as caller ID, call forwarding, call transfer, call waiting, redial, do not disturb, speed dial, 3-way calling and e911. But the real stars are the flexible new features enabled by our advanced IP infrastructure:

### AireSpring Everywhere

With Find Me/Follow Me, Virtual Private Numbers, and advanced call routing options, you'll get your calls wherever you are. Receive calls on your cell phone, desk, home, or selectively send calls to coworkers or even to voicemail. The control is in your hands!

### Auto Attendant

AirePBX offers a built in, full featured auto attendant with IVR, name dialing, extension dialing, department and hunt group support, and conditional routing for **no additional charge**. Others charge a pretty penny for what we include as part of our basic service.

### Unified Visual Voicemail

Get traditional voice messages and receive faxes as email attachments, or click and listen. Retrieving voicemail has never been so effortless.

### AireSpring Online

Our Self-Management portal is state of the art and designed using intuitive words and phrases to make it easy for any user to update their details, view call records and reports, change phone assignments and edit features and forwarding.

### Total Call Control

You decide how and which calls to receive. Want your calls to go to voicemail, your cell phone or your office assistant? No problem. Want only calls from certain individuals to ring through and the rest to go to voicemail? Easy. Want all your devices to ring at once? Consider it done. AirePBX puts the power in your pocket. You are in total control.

### Click to Call

Here's a neat trick. Add "click-to-call" buttons to your email or web page and your callers can reach you with a single click.

### Call Jump

Have you ever wanted to move a call from your desk to your wireless phone (or from your wireless phone to your desk)? AirePBX makes this possible. With a simple press of the button, you'll be able to move a call from one device to another without missing a beat. Your callers won't even know.

### Outlook Integration

You can make calls directly from Microsoft Outlook with seamless integration. Click the number and call.

## COVERAGE

Largest nationwide coverage available.

## COST SAVINGS

Save up to **50%** over the cost of traditional telephone service by moving your PBX or Key System to the Cloud with AireSpring. At AireSpring, we won't nickel and dime you for the features you want and need. You'll get AirePBX **FULLY LOADED** for one simple low price.

## FREE ON-PREMISE ENTERPRISE SESSION BORDER CONTROLLER

AireSpring provides a fully managed Enterprise Grade Session Border Controller to manage VOIP and Data traffic. This allows end-to-end Quality of Service (QoS) and Class of Service (COS) to be fully controlled for exceptional voice call quality.

## FREE ADVANCED IP DESK PHONES

Why pay for phones when you can get them for free?! While we give you lots of fancy upgrade options, the fact is that most companies will be thrilled with our FREE office phones (with 3 year contract). But, if you've got your eye on that futuristic video or touch screen phone, we've got those too!

## FREE PROFESSIONAL ON-SITE INSTALL

One of the greatest frustrations of a new phone system is getting it installed. Since we handle and host the phone system in the cloud and send professional installers to your office to set up the equipment and phones, there's nothing for you to worry about. Let us do all the hard work, that's what we're here for.

**AirePBX is more than just a phone system, it's a life assistant.**

Others charge you for different features sets or packages. At AireSpring, we give you all the features at no additional cost. It's AireSpring, fully-loaded, for less! Contact your AireSpring authorized agent today.
